

Course Menu Display Options

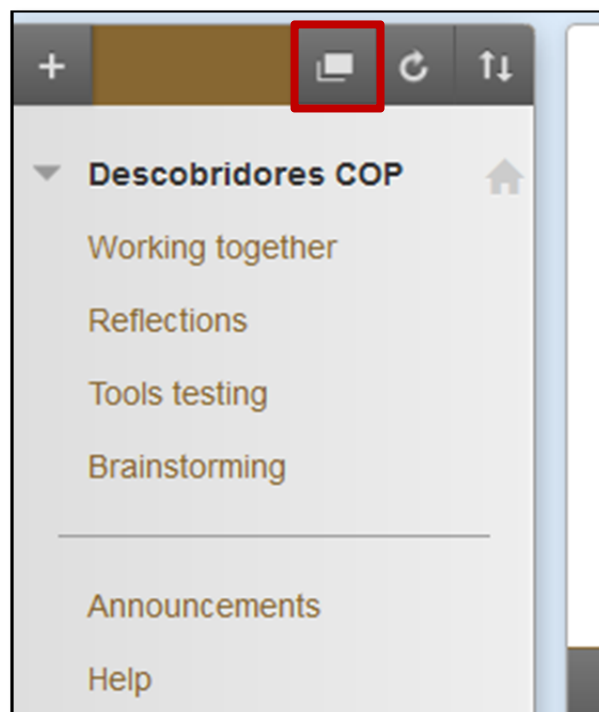

Views of the Course Menu

The Folder View and the Display Course Menu in a new Window options were now combined in one button. When you click on the button, it will open the menu in Folder View and it will remain on top in a new window. When you click on a link, it will open the page in the back window, so that the menu stays on top.

Before 20 September 2013

After 20 September 2013

Course Menu in new window
