

Test Access Log

A source of frustration for students, instructors, and test proctors is the inability to confirm whether students began a test or ran into problems during a test. Teachers and proctors have no way to verify student activity or lack of activity during a test. Students have no way to prove that they did begin a test and when. If students reported problems occurring during a test, they were either given the benefit of the doubt and the test was reset, or they were penalized for circumstances beyond their control.

SP13 addresses this issue by providing detailed information on student test attempt interactions. Instructors and other users who are granted permission, can view the **Access Log** for a test from the Attempts page of the test.

Instructions

The access log shows a detailed list of every interaction that students engage in when taking a test. If a student claims to have started a test, the log will show the time the test was started. If a network or internet disruption occurred during the test for example, the log would show an unusual gap in the time.
