# Test Workflow

Instructor creates questions from the 17 different question types and adds them to the test.

Instructor adds the test to a content area and sets the test options.

Each student completes the questions in the test and submits it.

If the test was set up to grade automatically.

If the test had questions that need the instructor to mark and provide feedback.

Students view their results and feedback in my Grades.

Instructor marks all the paragraph and short answer questions and provides feedback.

Instructor reviews the test statistics from the grade center and downloads the results.
