

# Create a Module Page

*Step sheet*

## What is a Module Page?

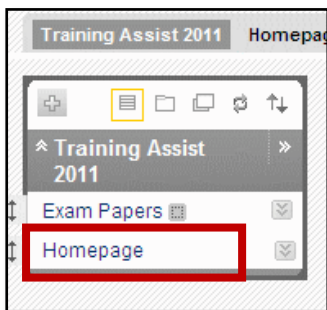

**Module Pages** contain **Course Modules** that you select from a list. A **Course Module** can be a tool, such as a calculator, or it can display dynamic information such as grades, alerts, and announcements. **Course Modules** can be added to **Module Pages** only. Many instructors will create a **Module Page** called **Homepage** that contains the modules that you and your students find most useful.

## How do I create a Module Page?

1. **Edit Mode** (top right hand corner) must be set to **ON**.
2. Point to the plus sign above the **Course Menu**. The **Add Menu Item** drop-down list appears.
3. Select **Create Module Page**.
4. Type a **Name** for the new Module Page. (For this exercise we used "**Homepage**")
5. Select the **Available to Users** check box. Module Pages can be created ahead of time, made unavailable, and then made available at the appropriate time.
6. Click **Submit**.

## Result

A link to the new **Module Page** appears on the **Course Menu**.

## How do I add modules to a Module Page?

Modules are items that include content, links or tools that can be added to personalise a page.

1. Click on the **Module Page** name that you have created on the **Content Area**.
2. Choose the **Add Course Module** option to add a specific module to the **Content Area**.
3. Click on the  **Add** button underneath the specific module that you want to add.
4. To remove the module click on the  **Remove** button.
5. Click the **OK** button in bottom right hand corner.
6. Click on the **Homepage** link to view the new Module Page, titled "**Homepage**".

Follow the same steps to add other **Menu Items**, e.g. **Content Area**, **Blank page** etc.
