# Quick links – New functionality

What is quick links?

This is an innovation that improves BB Learn's navigation experience for all users, but especially sighted keyboard-only users, through page header and landmark aggregation.

The Quick Links tool allows a user to quickly locate any heading or section within any page in the Blackboard Learn application and jump directly to it. This type of navigation efficiency for sighted keyboard only users is not available in any other application anywhere in the industry.

Located in the top left, the Quick Links icon opens a pop-up window that displays the landmark and navigation links on the page. Any available keyboard shortcuts for the page are also displayed. (Adapted from the BB Learn website: https://help.blackboard.com/en-us/Learn/9.1_SP_12_and_SP_13/Administrator/010_Release_Notes/020_SP_12_Release_Notes/000_SP_12_New_Features/Accessibility_Improvements)

Tested in: 🦊 V22   🔵 V28   Check your Browser and Operating System for compatibility with clickUP:
https://help.blackboard.com/en-us/Learn/9.1_SP_12_and_SP_13/Instructor/01_5Browser_Support_for_SP_13

This is what will be displayed when you click on the Quick links:

The course does **NOT** have a technical / technological focus. It will not teach you how to use the clickUP system from the technical / IT point of view, but this d
improve your technological skills as you progress through the course.

SHIFT + ALT + L
Open Quick Links

You don't have to programme anything to get the Quick links build, BUT beware what you call your headings since that will be used to create the Quick links.
