

Roles in a clickUP module

Fact sheet

Course roles control access to the content and tools within a course. Each user is assigned a role for each course in which they participate. For example, a user with a role of teaching Assistant in one course can have a role of student in another course.

The course role is set when a user is enrolled. It can also be edited after enrollment from the Control Panel.

Course Roles include:

- Course Builder
- Grader
- Guest
- Instructor
- Student
- Teaching Assistant

The table below is a summary of the roles and the attributes for each role.

Role	Instructor	Student	Teaching Assistant	Course Builder	Grader	Guest
Attribute						
Main role	This role is generally given to those developing, teaching, or facilitating the class.	Student is the default course Role.	Co-teacher. Teaching Assistants are able to administer all areas of a course. Their only limitations are those imposed by the Instructor.	Build the course. This role is appropriate for a user to manage the course without having access to student grades.	Assists the Instructor: <ul style="list-style-type: none"> In the creation, management, delivery, and grading of items, such as Tests and Discussion Board posts. Managing the Grade Center.
